

NorStone introduces in exclusivity 6 new AV / hifi stand, a new range of mounts, and a new range of ethernet cables !

NorStone AV stands

The new Norstone Carly

The refined and simple design of Carly features a beautiful black lacquer finish,. Its frame structure was designed to partly house your electronics on the intermediate shelf and into the lockable shelf unit (w/ door). Our exclusive Cooling door system, allows a perfect ventilation of your electronics without any risk of overheating even when the door is shut.

The new member of Kubben family : the Kubben WB

Zen, rigorous lines and harmonious proportions for a contemporary range of furniture. The way the dark wood contrasts with white glass gives the look of floating on the frame. The Kubben WB supports larger flat screens at the perfect viewing height. Its wide internal shelf will house your full AV system, while being cooled even if the door is shut.

The Cinema

Cinema is NorStone's first piece of AV furniture made of bamboo plywood. NorStone chose to use this tree species as a sustainable option with a lower impact on the environment. The bamboo species we use allows strong and sturdy constructions. Acoustic cloth in its central section permits to hide a center speaker and any power cable (gathered in the rear), while the electronics are housed on the sides. You will not have to make a choice between quality and elegance.

The very state of the art Lunde

This black lacquer piece of AV furniture will house your system with style. Very refined and elegant, the lunde has a very sober design, to match with any kind of decors. A cable management system is set up on the back to hide all the cables, leaving only space for the purity of the Lunde's shapes.

Saebby

The neatly designed Saebby is a wide and low piece of AV furniture that will match any home design. Its contemporary looks and style will suit any modern and beautiful flat screen. A mix of black and white lacquer sets off your AV equipment perfectly and your flat screen stars on top of this classic piece of furniture. The 60° swivel (30°+30°) allows everyone in the viewing room to enjoy the show wherever they are seated.

ESSE Hifi

The ESSE hifi is the new baby of the ALREADY famous ESSE stand family, in hifi version.

The plain and refined design of the Esse Hifi makes it a functional and elegant piece of furniture ready to house your AV equipment with style. The top shelf also welcomes any turntable or flat screens up 32 inches.

NorStone mounts

NorStone introduces in exclusivity at ISE a brand new range of brackets, projector mounts and accessories.

Very slim, the NorStone range is now in perfect match with the nowadays very flat screens on the market, at very affordable prices.

New products such as Magic 3255 (left picture) (**49€ retail**), Slim 2337 (**39€ retail**), Slim V200 (**19€ retail**) and a good few other, makes of NorStone a must have in the accessories business.

A new accessory like Iryx (below picture) is a step ahead from its competitors, as it permit to connect till 8 electronics to the same IR captor, to enable to the consumer to keep the door of the TV stand shut when using their equipment. (**49€ retail**)

NorStone cables

NorStone launches at ISE its new 2 ranges of **HDMI Ethernet cables**, the HDR180 as entry level and the HDS540, the silver range. Retailed at a very competitive price of **39€ for 1,5m** for the HDR180, and **89€ for 1,5m for the silver HDS540 version**.

Norstone will break into the market of HDMI cables with these new models, compliant with the latest HDMI 1.4 norms, (3D, Audio return channel, Ethernet, etc)
